## SESSION SUMMARY

SG1J

SESSION: [REDACTED], 22 JUL 87, 1321-1459 HRS

There was some confusion from the beginning as to what the target was. A group of structures seemed to be more dominate. There is a city situated on a flat plain with moderate-size mountains in the distance. The mountains are in a direction of north and northeast of the city. The focal point was a large room, within a structure located in the "old quarter" of this city. This room was large, with a very high ceiling and a small, rectangular, barred window near the top of one wall. It is dirty, filthy and vermin infested. At the present time, the room is empty and unoccupied. However, there is an impression of a person occupying it in the near future. This person is alone, lonely, and much like a prisoner in solitary confinement.

An additional target was identified and is located in the foothills of the mountains northeast of the city. It seems to be a large cavern or vault inside and underneath a large hillside or small mountain. There is a large, iron, sliding door inside. This target appears to be empty and abandoned at present, but there is an impression that it was once used for storing supplies and as a shelter. Perhaps sometime during the first half of this century.
